

Product Requirements Document (PRD)

Project: Irokin Electrical & Building Construction Corporate Website **Target Output:** Production-ready frontend code (Static Site)

1. Project Overview

Build a lightning-fast, high-converting, and highly secure static corporate website for a Nigerian integrated building and services company. The site must establish deep technical authority, specifically highlighting expertise in structural engineering, smart home wiring, low-voltage troubleshooting, and PLC-based automation.

2. Technical Stack & Infrastructure

- **Framework:** Astro (preferred for zero-JS by default) OR Next.js configured for strict Static Export (output: 'export').
- **Styling:** Tailwind CSS.
- **Deployment Target:** Vercel.
- **Form Handling:** Vercel Forms, Formspree, or Getform (no backend database). Ensure webhook capability is noted for routing form submissions directly into HubSpot or Salesforce pipelines to trigger automated ticket workflows.

3. Design System & UI/UX Guidelines

The UI must feel industrial, robust, and modern. Avoid heavy border-radiuses; use sharp, structured edges for cards and containers.

Color Palette (Tailwind Config)

- **Primary (Backgrounds, Nav, Headings):** Deep Midnight Blue (e.g., #0A192F or similar navy).
- **Action/Highlight (CTAs, Icons, Active Links):** Golden Yellow (e.g., #FFC107 or a bright gold to match the lightning bolt logo).
- **Secondary Accent (Dividers, Sub-text):** Metallic Light Blue (e.g., #8CA8D1).
- **Base/Surfaces:** Crisp White and Light Slate Gray for clean portfolio sections.

Typography

- **Headings:** Bold, architectural sans-serif (e.g., Montserrat or Oswald).
- **Body:** Clean, highly legible sans-serif (e.g., Inter or Roboto).

4. Information Architecture (Sitemap)

1. Home (/)
2. About Us (/about)
3. Services (/services)
4. Portfolio/Projects (/projects)
5. Contact (/contact)

5. Page-Level Specifications

A. Homepage (/) Layout Flow

1. **Navigation Bar:** Sticky top. Logo left. Links right (Home, About, Services, Projects, Contact). CTA Button ("Get a Quote") in Golden Yellow.
2. **Hero Section:** * Dark Midnight Blue background.
 - Headline: "We build it solid, wire it safe, repair it right, and finish it fine."
 - Sub-headline: "Integrated Building, Electrical, and Engineering Services in Abia State."
 - Primary CTA: "Request a Consultation".
3. **Services Overview Grid:** 4 structured cards with sharp edges.
 - Building Construction.
 - General Electrical & Smart Solar Systems.
 - Electronics Repairs.
 - Interior Decoration & Finishing.
4. **Core Values (Brief):** A distinct section highlighting Safety, Quality, Integrity, Innovation, and Customer Focus.
5. **Trust/Footer Pre-amble:** Call to action banner leading to the contact page.

B. Services Page (/services)

- Create a detailed layout that allows for deep technical descriptions.
- Ensure the "Electrical Work" section has designated UI space to list specific technical competencies (e.g., residential wiring, industrial electrical panels, low-voltage system diagnostics, and PLC automation).

C. Contact Page (/contact)

- **Left Column:** Contact details and embedded Google Map of Abia State.
- **Right Column:** Contact Form.
 - Fields: Full Name, Email, Phone Number, Service Required (Dropdown), Project Description.
 - Button: "Send Inquiry" (Golden Yellow).

6. Global Footer Specifications

This footer must be hardcoded on every page for local SEO and corporate credibility. Use a dark background (Midnight Blue).

- **Company Name:** Irokin Electricals & Building Construction Engineering Services
- **Registration Number:** RC: 9500063
- **Leadership:** CEO: Engr. Okoji Joseph Okezie
- **Physical Address:** No. 5 Amaokwe Item, Bende, Abia State, Nigeria
- **Contact Number:** Mobile: 07038581945
- **Copyright:** © [Current Year] Irokin Electricals. All rights reserved.

7. Execution Instructions for AI

- Generate the complete file structure and configuration files first (e.g., `tailwind.config.js`, `astro.config.mjs` or `next.config.js`).
- Provide the code for the layout wrapper (Header + Footer).
- Provide the code page by page, prioritizing responsive mobile-first Tailwind classes.
- Use placeholder images (via `via.placeholder.com` or Unsplash source URLs) but ensure aspect ratios are defined.

Next Steps for You:

When you are ready to start coding, paste the block above into your AI assistant and add this sentence at the very end:

"Acknowledge these requirements and provide the initial terminal commands to set up the project and the `tailwind.config.js` file."
